- For installing and removing wheel nuts/bolts on commercial vehicles
- Extra long lever arm (max. length 1,430 mm) allows application of high forces (up to 1,200 Nm in extended position)
- 3 pieces – tool can be disassembled and allows space-saving storage in the storage or tool box
- 8-point extension for deeply located screwed connections
- For the operation of sockets of different sizes figuring in the $\square 3/4$ range, e.g. HAZET 1000 S
- The fitting accuracy of interior and exterior tube provides exact and safe fit in every length
- Safety pin avoids unintentional loosening – removing of safety pin with pin $\varnothing 3$ mm
- Special welding method provides force-fit connection of inside square $\square 3/4$ and exterior tube
- Highly-tempered special steel, burnished

- **New design with plastic coated semiflexible Bowden cable**
- One-hand operation – release of the fixing device by pressing the button on the handle
- Especially appropriate for areas with restricted access where the application of usual pliers is not possible
- The Bowden cable allows working without a guiding hand and is suitable for overhead working as well as for areas located deeply in the motor
- For the operation of self-gripping spring band hose clamps on cooling and heating circuits
- Newly developed slide device with integrated tension spring and adjustable reversible plate
- Automatic toothed fixing device for the fixation of the mounting/dismounting position
- Handles with plastic coating for better gripping comfort
